

CURCUM-EVAIL® CHEWABLES

HIGHLY BIOAVAILABLE CURCUMIN FORMULATION IN A DELICIOUS MANGO-NECTARINE CHEW
60 SOFT CHEWS | NPN80097678 | CURC60-CN

Curcum-Evail® Chewables provide a unique combination of health-promoting compounds known as “curcuminoids,” which are derived from turmeric root. Turmeric is a bright yellow-orange spice popular as the main ingredient in Indian curry powders, and its high concentration of curcumin underlies the centuries-old use of this root in Ayurveda, traditional Indian medicine. Like cinnamon, cayenne, cloves, and ginger, turmeric is considered a “warming” spice, and it has traditionally been used as a health-promoting substance. The curcuminoids in this product are the strongest and best researched constituents of turmeric root.

Curcum-Evail® Chewables offer this powerful curcuminoid combination in mango-nectarine flavoured chews, making this product delicious, fun, and suitable for all ages!

BENEFITS:

- Chewable delivery form offers unique support for oral and periodontal health
- Curcumin’s properties also help to support the health of the body by providing antioxidants which help protect against damage caused by free radicals

OVERCOMING HURDLES TO MAKE THIS PRODUCT UNIQUE & EFFECTIVE

The compound curcumin is made up of a crystalline structure that makes it difficult for the body to absorb, creating a challenge in formulating an effective supplement. Curcum-Evail® Chewables have been specifically designed in order to overcome this hurdle through two unique characteristics:

- **Novel Manufacturing Process:** This product is manufactured using a novel, patented process that boosts the absorption and delivery of curcumin. It uses a proprietary blend of standardized curcuminoids, sunflower lecithin, and vitamin E without the use of potentially harmful surfactants. Our unique manufacturing process results in highly bioavailable curcumin, allowing the body to absorb this nutrient and reap its benefits.
- **Chewable Delivery System:** Curcumin offered in a chewable supplement works as a topical delivery system, and allows for it to efficiently penetrate the inside lining of the mouth, greatly assisting with absorption and making it helpful for targeting oral and periodontal health. This also allows for the curcumin to be delivered throughout the body in order to support many other aspects of our health.

ADDITIONAL HIGHLIGHTS

- While many curcumin supplements contain low amounts of this wonderful spice’s active components, this product provides a much higher concentration of these compounds than would typically be obtainable from food alone.
- This product does not contain artificial sweeteners; it is sweetened with tapioca syrup, allulose and stevia leaf extract.

Recommended Dose: Take 1 chew per day, or as directed by your health care practitioner.
